Green and Clean Village

Green' refers to a world in which natural resources, including oceans, land, and forests, are sustainably managed and conserved to improve livelihoods and ensure food security, and most importantly protect the environment for future generations. 'Clean' refers to access to safe and adequate drinking water and sanitation services, low-pollution, low-emission world in

which cleaner air, water, and oceans enable people to lead healthy and productive lives. Thus, a GP that chooses to focus on becoming a Clean and Green Village would need to have clarity regarding the preservation and maintenance of the components that covers water resources, and its link to rivers and streams, and land resources and soil health.
